Archaeology - Wikipedia
Archaeology or archeology is the study of human activity through the recovery and analysis of material culture. The archaeological record consists of artifacts, architecture, biofacts or ecofacts, sites, and cultural landscapes. Archaeology can be considered both a social science and a branch of the humanities. In Europe it is often viewed as either a discipline in its own right or a sub-field

Topic Areas of Environmental Sociology - ThoughtCo
Aug 31, 2019 · Contemporary Issues in Environmental Sociology. Climate change is arguably the most important topic of research among environmental sociologists today. Sociologists investigate the human, economic, and political causes of climate change, and they investigate the effects that climate change has on many aspects of social life, like behavior

Herem (war or property) - Wikipedia
Ethical issues. Theologians and other scholars have commented on the ethical and moral dilemmas posed by the wars of extermination, particularly the killing of women and children. Maimonides applies the rules from Deuteronomy 20:10 (the rules governing discretionary wars) to the war on the Canaanite nation, and suggests that the commandment to
